**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ALL claimed subject matter must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The claims are replete with subject matter not illustrated. No comprehensive listing is possible within a reasonable time, but see for example, all details of the preamble of claim 1, the connection to the vehicle, the bearings contacting upper and lower surfaces of the rails, etc..

### *Specification*

2. The disclosure is objected to because of the following informalities: the specification is translated in a form using non-idiomatic terms in the English language. See page 14, line 13, page 15, line 9, for example.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 5, 6, 9, 11, 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which

Art Unit: 3612

was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The function of energy-absorbing bearings 3,3' are not understood. Bearings are used to reduce friction and no movement involving friction is understood in this regard from the disclosure. Nor are the use of "nails" understood in this context. Nails are driven into material to secure other objects thereto.

Claim 6 lacks any disclosure to materials, or "conventional bearings".

Claim 11 is not supported by the specification as to a "big end" and a "square shape".

Claim 13 is not apparently disclosed as to the claimed notches for "nails", as to structure and function.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with terms lacking clear antecedent such as "the housing wall", claim 2, "shaft holds", claim 1, "the front part of the movable bracket", claim 1, "the maximum value of the length", claim 4, etc.. All terms should have clear antecedent for understanding.

Art Unit: 3612

"The materials...are different", claim 6, not only lacks antecedent, but no materials are defined in the specification and "different" is clearly indefinite. See similar terms such as "conventional", "wider", "longer". See similar language in claim 12, 13.

Claim 14, in describing a crash condition, is confusing in reciting a "manually operated control hammer".

In general the claims should be replaced by clear recitation of the invention, the responsibility of the applicant and counsel.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All show latch released safety seats.

#### ***Allowable Subject Matter***

8. Claims 1-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
